

Safety Products and Services

Engage Professionals, Reduce Costs, Manage Risks.

Why Utilize Our Safety Products and Services?

Occupational Safety and Health Administration (OSHA) issues costly citations to organizations for presence of conditions that can injure or kill workers. One or more of the top ten OSHA citations impact every business with 10 employees or more. Emarico's safety training educates employees on targeted areas to promote safety awareness.

A commitment to a safe workplace produces lower workers' compensation insurance costs, increases productivity, increases morale, and reduces turn-over. The cost of accident prevention is far lower than the cost of accidents.

“ Traffic Accidents are the number one cause of worker deaths. Vehicle liability is applicable for every employee who drives on company business even if they use their own car. ”
